					8ACA – Trades Academy (Offsite)	
				8SIL – Senior Independent Learning		
COR Correspondence – other options may be available for study by distance learning						

In selecting course options and deciding on course of study, students need to consider and balance their interests, passions and strengths with their potential future and pathway while keeping their options open.

Junior students study twelve options per year and senior students six options per year. In Year 9, they take a full-year of English, Mathematics and Social Science, and compulsory options in Health & Physical Education and Science. They must then choose an option each from Arts, Languages, Technology and any other Learning Area.

In Year 10, they take a full-year of English, Mathematics and Science, and compulsory options in Health & Physical Education and Social Science. They must then choose four more options to suit their pathway and passions. If they are unsure, they should continue to take another Art, Language and Technology to keep their options open.

In the senior school students study six full year subjects towards their NCEA qualification. In Year 11 students study six options which must include English, Mathematics and Science. English is strongly recommended in Year 12. Most students in Year 13 take five subjects plus SL.
